2014 National 4-H Congress:
National 4-H Congress is the flagship event of the 4-H program. For 80 years, youth from the United States and its territories have participated in this youth leadership development conference. Congress provides youth, ages 14-19, a quality, educational and cross-cultural experience that exceeds what any state independently provides. It is designed to address the needs and issues of youth while helping to develop capable, competent and caring citizens. Each year, the design team analyzes current youth issues and determines the most effective ways to address them. National 4-H Congress is held November 28 – December 2 in Atlanta, Georgia. The approximate cost of this trip is estimated at $1,400. Applications are available now and are due back by June 10, 2014 to the Extension Office. All applications are due to the State 4-H Office by June 13, 2014. No late applications will be taken. After applications are turned in, interviews will be scheduled via interactive video for the first or second week in July. If you are interested in this amazing 4-H opportunity, please contact the Extension Office for more information or to pick up an application.

New 4-H enrollments will be taken at any time, but a cutoff date of June 1 is in place for most livestock projects with the exception of market beef and breeding beef participants because these projects have earlier deadlines to meet. If you are interested in taking a livestock project, it is your responsibility to be aware of all deadlines pertaining to livestock projects. National 4-H News

National 4-H Council is pleased to announce a 4-H National Leadership Committee has been established to provide a structure for convening the three organizations that partner to provide 4-H positive youth development: the United States Department of Agriculture-National Institute of Food and Agriculture (USDA-NIFA), Cooperative Extension and National 4-H Council. This committee will foster proactive communication and collaboration in order to focus on issues of national importance to 4-H, including: Expanding 4-H to reach more urban and rural underserved audiences; recruiting a more diverse 4-H workforce; increasing the cultural competency of existing paid staff and volunteers and developing sustainable, new resources to support the expansion of the 4-H program. Surrounded by 4-H members from across the country, Cooperative Extension, USDA-NIFA and National 4-H Council showed united support of positive youth development by signing a Memorandum of Understanding (MOU) for this 4-H National Leadership Committee, clarifying the roles and responsibilities of each party. ECOP Chair-elect, Delbert Foster, South Carolina State University, signed the MOU on behalf of ECOP Chair Jimmy Henning, University of Kentucky, along with USDA-NIFA Director Sonny Ramaswamy and National 4-H Council President and Chief Executive Officer Jennifer Sirangelo. The signing took place as part of the historic Cooperative Extension Centennial Convocation, May 8, 2014 in Washington, D.C. The convocation commemorated the Smith-Lever Act signed on the same day 100 years ago establishing Cooperative Extension nationwide through the Land-Grant University System. A video recording of the event, including the signing of the MOU will be available at www.windrosemedia.com/windstream/ext100years/. In addition to honoring the legacy of Cooperative Extension, speakers provided a compelling vision for another 100 years of Extension educational excellence by extending knowledge and changing lives.

### National 4-H News

#### Rockets to the Rescue!

**4-H National Youth Science Day**

*4-H National Youth Science Day (NYSD)* is an exciting, interactive learning experience that engages thousands of youth across the country in conducting the National Science Experiment. The national 4-H NYSD event will take place on October 8, 2014 in Washington, D.C.

The University of Arizona developed the 2014 National Science Experiment: *Rockets to the Rescue!* Learn more about this exciting activity which focuses on aerospace engineering.

Science kits for the 2014 National Science Experiment are available for pre-order - buy now from the 4-H Mall.

**Why 4-H National Youth Science Day?**

**STEM is the wave of the future.** Experts credit technological innovation with almost half of U.S. economic growth over the past 50 years, and nearly all of the 30 fastest-growing occupations in the next decade will require at least some background in STEM.

**But, America is falling behind.** Today, the United States ranks 27th among developed nations with college students receiving science or engineering degrees. Only one percent of fourth-graders, two percent of eighth-graders and one percent of high school seniors are deemed “advanced” in science. Only 45 percent of U.S. high school graduates in 2011 were ready for college work in math and 30 percent were ready in science.
