

University of Nevada Cooperative Extension - Demonstration Gardens

List of Plants by Botanical Name in Alphabetical Order

The University of Nevada Cooperative Extension (UNCE) Demonstration Gardens are part of the Outdoor Education Center of the Clark County Lifelong Learning Center located at 8050 Paradise Road, Las Vegas, NV 89123.

The gardens are open to the public from 8:00AM to 5:00PM Monday-Friday and occasionally on Saturday.

More than 1000 different plants are displayed with a sign including their botanical name and common name.

The plant list and the signs are maintained by the Master Gardeners of Southern Nevada who also offer tours of the gardens.

For more information, call the Master Gardener Help Line at 702-257-5555.

The demonstration gardens have drought resistant trees, palms, shrubs, perennials, ornamental grasses, ground covers, vines, wildflowers, agaves, aloes, bulbs, cacti, cycads, desert bromeliads, dasyliroids, nolinias, succulents and yuccas.

The Cactus Garden features an extensive collection of more than 170 different cacti. The Rose Garden includes 50 desert-adapted roses able to withstand a hot and dry climate. The cold-resistant Palm Collection features more than 90 different palms that can survive below freezing temperatures. Native plants suitable for xeriscaping also offer a source of rare seeds.

An Ornamental Trial Project tests new plants for growers who want to know if they can survive the harsh climate of the Mojave Desert.

The Outdoor Education Center also includes a Children's Garden, Herb Garden and test Vegetable Gardens that are not included in this plant list.
