New Faces, New Places: 
An Introduction to 4-H for Urban Audiences

This curriculum is designed specifically for a new audience and is used as a promotional and recruiting tool, as well as an entrance to Nevada’s 4-H. It provides opportunities for youth and adults entering Nevada’s 4-H system to develop life skills while using programs in Animal and Plant Sciences, Arts and Crafts, Healthy Lifestyles, and Aerospace and Technology; and for them to work in partnership as they clarify necessary life skills such as positive self-concept, inquiring mind, healthy interpersonal relationships and sound decision-making.

These skills would help them become healthy, self-directing, contributing members of society. These life skills are accomplished through a set of educational learning experiences in programs activities which are explained in this curriculum.
