Club News

New Rocketry Club forming:

There will be a new 4-H Model Rocketry Club forming for the 2016-2017 4-H year. With model rocketry you can set your course and aim high, start small and go big and it's more than just flying a rocket. There are already plans under way for the 2017 Tri-County Fair. You will have the opportunity to display your rocket and be awarded for your skill and craftsmanship. Many rocketeers start off with small, easy to build kits, then progress to larger, multi-stage rockets and eventually reach great heights with high-powered rocketry. Building and flying a model rocket with your own hands and your own mind can encourage interest and education in a variety of important fields. Model rocketry can provide you with a great appreciation for mathematics, science, physics, technology, astronomy, chemistry and engineering. Model rocketry teaches skills and knowledge such as construction and building techniques, Newton's Laws of Motion, safety procedures, aerodynamics, rocket stability, altitude tracking, design and engineering and the history of rocketry and spaceflight. Project meetings for the model rocketry club will be held monthly beginning in October. The new Model Rocketry project will hold its first meeting on Saturday, October 29, 2016 at 10:00 a.m. in

the 4-H Meeting Room at the Extension Office. The agenda for the meeting will include the basics of model rocketry, the NAR safety code, online resources and possible launch sites. For more information you may contact club leader, Gary Robbins at 916-718-3786 or garyrobbins1976@gmail.com or to sign up for the club, contact the Extension Office at 623-6304.
