Small Motor
Non-edible Baby Donut

Materials needed:

Scrap of cloth fabric
Polyester stuffing
Donut pattern

Make a copy of the pattern on the next page of this handout. Cut two pieces of fabric using the pattern you have made. If you have a zig zag sewing machine, you can put the wrong sides of the fabric together and zig-zag around the edges leaving an opening to stuff the donut with polyester stuffing. Zig-zag the opening closed. Check the toy periodically and make sure that all the seams are secure. Your baby will enjoy playing with these toys in the crib or on the floor.

(One to Four Months)
