Dramatic Play
Plumber’s Friends

Inexpensive PVC pipe cut to various lengths and an assortment of fittings, such as T's and end caps will keep a preschooler busy creating structures and games. You can buy expensive “pipe” toys or you can make them yourself. Another plumbing tool that will capture your child's imagination is a plunger. Buy a new plunger that will be used only as a play thing. Your child will soon realize that it can become many different things – a horse, a frog are just two that come to mind.

(Twenty-four Months and Older)
